

Fall 2026

STEM Learning with Dotty's Place

While We Were Away...

Taking a few weeks away from regular programming gave me a chance to step back, organize, and think about how Dotty's Place can continue to grow. Some projects are finished. Others are still taking shape. But here's a peek at what's been happening behind the scenes.

✓ *A Growing STEM Learning Page*

More articles, downloads, activities, and practical ideas for parents, homeschool families, and educators.

✓ *Resources That Are Easier to Use*

Look for a mix of Quick Reads, infographics, longer articles, and downloadable tools—so you can choose how deeply you want to explore a topic.

✓ *A New Workspace Taking Shape*

Work has begun on a dedicated Dotty's Place office and workspace, with more room to organize materials, prepare STEM Game Times, and create new resources.

✓ *More Ways to Find & Save Ideas*

I'm branching out to Pinterest and other online resources. My goal is to make it easier to discover my ideas and come back to them when needed.

✓ *Preparing for Another Year of STEM Game Times*

Kits, materials, and activities continue to be refined based on what I've learned from working with students.

And We're Just Getting Started...

Not everything is happening at once. I know that's just part of the process. This year, I'm looking forward to continuing what works, trying a few new things, and creating more opportunities for children to explore, build, question, and discover.
